Owners of Baja Gold Salt Co.

REPORT OF ANALYSIS

For: (27137) SEAAGRI SOLUTIONS LLC
Baja Gold Mineral Sea Salt (Air)

Analysis	Level Found As Received	Units	Reporting Limit	Method	Analyst-Date	Verified-Date
Sample ID: **Baja Gold Mineral Sea Salt (Air)**	Lab Number: **70731932**					
Sodium (total)	235000	ppm	5.00	USP <233>(ICP)	erw9-2025/12/17	ras7-2025/12/24
Calcium (total)	1820	ppm	5.0	USP <233>(ICP)	erw9-2025/12/17	ras7-2025/12/24
Potassium (total)	34700	ppm	5.0	USP <233>(ICP)	erw9-2025/12/19	ras7-2025/12/24
Magnesium (total)	33500	ppm	5.0	USP <233>(ICP)	erw9-2025/12/17	ras7-2025/12/24
Iron (total)	6.36	ppm	5.00	USP <233>(ICP)	erw9-2025/12/17	ras7-2025/12/24

All results are reported on an AS RECEIVED basis, ppm = parts per million, ppm = mg/kg, ppm = mg/L

REPORT OF ANALYSIS

For: (27137) SEAAGRI SOLUTIONS LLC
Baja Gold Mineral Sea Salt (Air)

Detailed Method Description(s)

ME 042

Analysis follows MWL ME 042 which is based on USP 233 and EPA 6010, Inductively Coupled Plasma (ICP), previously reported as ICAP.

A light emission technique where prepared samples are injected into a high energy plasma that forces the elements in the injected sample to emit light wavelengths that are specific to each metal present. The intensities of which are proportional to the level of minerals and metals present. The light is then detected and correlated to the levels of minerals and metals in the original sample.

ME 080

Sample preparation for metals analysis referenced by <USP 233> follows MWL ME 080 which is a microwave assisted wet-ash digest or a "neat" dilution.

The result(s) issued on this report only reflect the analysis of the sample(s) submitted.
